PROFILE

I am an aspiring software engineer passionate about learning and growing in the world of programming and web development. I am a quick and sharp learner, able to adapt to new technologies and concepts with ease. My dedication to coding, curiosity for innovation, and ability to work well in collaborative environments drive me to contribute positively to any team.

EXPERIENCE

Event Management System

JAN 2025 – JUN 2025

Final Year Project | Next.js, .NET, MSSQL, Azure DevOps

- Developed a web platform to streamline university event management with online registration and payment integration.
- Implemented secure ticket generation with unique entry codes sent via Gmail after payment verification.
- Designed a media gallery showcasing event highlights to encourage future participation.
- Managed deployment and CI/CD processes using Azure DevOps.

Eye-Tracking Mouse Cursor

JULY 2024 – AUG 2024

PBL Project | Python

- Earned **1st place** in university PBL (Project-Based Learning) competition for innovative problem-solving and practical AI application.
- Developed a Python application using OpenCV, MediaPipe, and PyAutoGUI to control the mouse cursor through real-time eye movement tracking and perform mouse clicks by detecting intentional blinks.
- Implemented facial landmark detection to map eye coordinates to screen positions and trigger click events based on eye blink distance threshold, enabling hands-free computer navigation.

Redstore

MAY 2024 – JUNE 2024

E-commerce Project | PHP, MySQL, XAMPP

- Enhanced an existing e-commerce frontend by integrating full CRUD functionality using PHP.
- Developed features to add, update, and remove products, dynamically fetching product data from a MySQL database.
- Implemented user authentication with secure credential storage, improving overall functionality and usability.

Frontend Web Project | HTML, CSS, JavaScript

- Designed a vibrant, interactive website for an online toy store with a user-friendly interface.
- Built smooth page transitions and intuitive navigation for an engaging user experience.
- Showcased toy collections with responsive layouts, ensuring seamless browsing on all devices.

EDUCATION

Associate Degree program In Computer Science (ADP CS)

 SEP 2023 - MAY 2025

Superior University | Lahore, Pakistan

Intermediate in Computer Science (ICS)

 SEP 2021 - AUG 2023

Fazaia Intermediate Collage | Lahore, Pakistan

LANGUAGES

English

 Fluent

Urdu

 Native/Bi-lingual

SKILLS

HTML5

CSS 3

Javascript

Front end developer

Bootstrap

Angular

React Js

Next Js

C#

Dot Net

Kotlin

Mobile App Development

MySQL

C++
